

COURSES IN OCCUPATIONAL SAFETY AND HEALTH (OSH)

INTRODUCTION

The word "safety" is coherent and easy to understand. Nobody wants to jeopardize himself or herself, to harm or to expose their colleague to dangerous situations. Therefore, the motto of "safety first" and "safe work culture (budaya kerja selamat)", are very popular at the workplace. However, the word "risk" and "danger" are quite difficult to understand particularly to the workers. Thus, an accident resulting in death, property loss and damage to the environments always occur at the workplace.

According to the Occupational Safety and Health Act (OSHA) 1994, every employer is responsible to manage any risks created at workplace, and operate in safe manner so that the safety and health of workers are protected. High awareness and continuous training in safety and health of the workers should be encouraged to ensure that every worker carries the safe work habit at the workplace.

REFERENCES

Universiti Teknologi Malaysia (UTM) is a centre of knowledge and has established database network around the world. UTM has a broad source of technical information on safety and health through continuous research and development (R&D) activities. As a result, the contents of the module will be updated with time basis following the current legislation and best practice.

TRAINING MODULES AVAILABLE

MODULE 01	Introduction To OSH Legislation & Standard
MODULE 02	Occupational Safety & Health Management
MODULE 03	Empowering Safety & Health Committee
MODULE 04	Emergency Management
MODULE 05	Occupational Safety & Health Awareness 1 day
MODULE 06	Fire Safety Management
MODULE 07	Occupational Health
MODULE 08	Personal Protective Equipment (PPE)
MODULE 09	Forklift Safety
MODULE 10	Accident Prevention, Investigation & Reporting
MODULE 11	Chemical Handling Safety
MODULE 12	Permit To Work System
MODULE 13	Hazard Communication Program
MODULE 14	Equipment Safety
MODULE 15	5S / Housekeeping 1 day

METHODOLOGY

The delivery has a balance of lectures, workshops & video presentation to assist participants to interpret the OSH requirements in practical situations, together with flexible questions & answer sessions.

NUMBER OF PARTICIPATIONS

Maximum 20 per session.

CERTIFICATE

Certificate issued by GASTEG, UTM.
